Portfolio Manager

ATB Investment Management Inc.

My Objectives

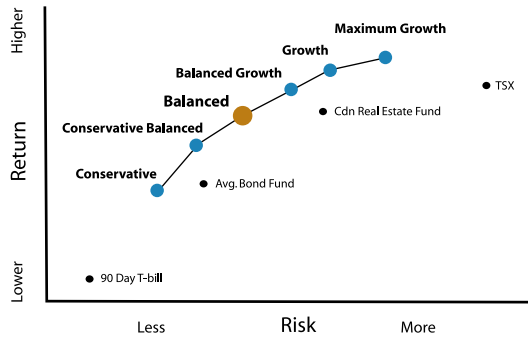

"I want my investment to grow steadily while defending against large fluctuations in value."

The Compass Balanced Portfolio will accomplish my objectives by

Allocating my investment across a diversified portfolio of fixed income securities, global equity securities, and income trusts to provide long-term capital appreciation while reducing short-term volatility.

The Compass Balanced Portfolio suits me because

- I am seeking to maximize my return potential for the level of risk that I am willing to take.
- I plan to stay invested for at least four years.
- I want professional portfolio managers to evaluate and adjust my investment portfolio to maintain my objectives.

The Compass Balanced Portfolio diversifies my investment by

Asset Class

An optimal mix of government, corporate, and high yield bonds, company shares and income trusts.

Geographic Region

A balanced mix of Canadian, U.S., and International securities.

Market Capitalization

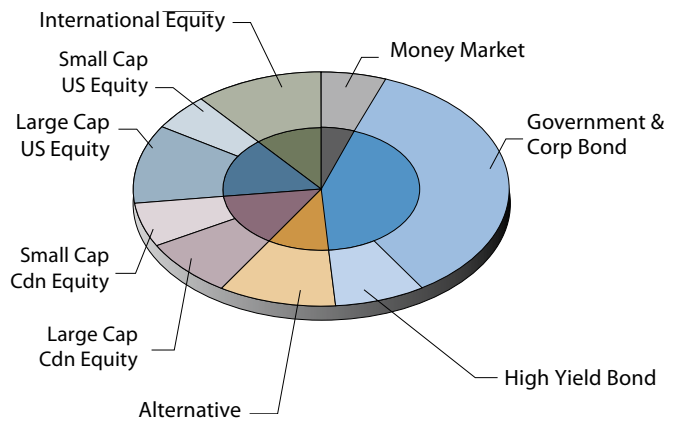

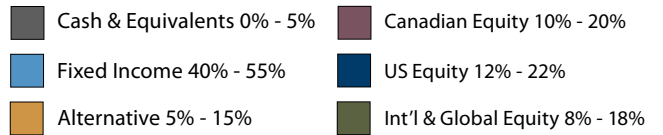

Blend of "large-cap" and "small-cap" company shares.

Investment Style

Complementary blends of active and passive investment management styles.

Manager

Multiple best-in-class investment managers to add expertise and reduce risk.

COMPASS PORTFOLIO SERIES™

Underlying Investments

Underlying investments are objectively selected from leading investment managers, based upon:

1. Proven track records of value-added performance;
2. Solid management processes;
3. High potential to repeat performance while containing risk; and
4. Obtained at a significant cost advantage.

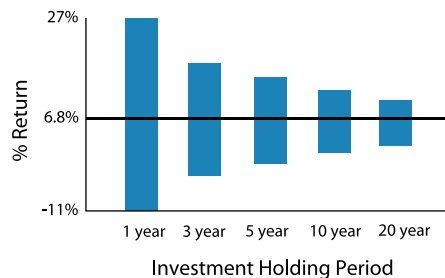

Investment Manager	Underlying Investment	Asset Class	Target Weighting

			100%

Your portfolio is regularly monitored and re-balanced to target weightings to stay focused on your objectives.

Performance Projection:

Variability of return decreases as your investment holding period increases.

- Potential performance range over 1-year periods as high as 27% to as low as -11%.
- Potential performance range over 20-year periods as high as 11% to as low as 2%.
- **Long-term target performance is 6.8%.**

The potential return range and long-term target performance illustrate the effect of holding a diversified investment portfolio mixing various asset classes and are not specific estimates or a guarantee of performance. They are based on historical performance of market indices for each asset class and forward projections of economic trends using a 95% probability factor.

Management Expense Ratio ("MER") 1.92%

The MER includes management fees, operating expenses, and GST. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. Unit values of mutual funds will fluctuate and past performance may not be repeated.
