HISTORICAL RANGE OF RETURNS

This graph shows the range of returns using historical one year rolling returns for the Compass Growth Series O Portfolio as of December 31, 2023. Rolling returns are calculated by advancing one month sequentially for consecutive periods.These numbers are annualized and based on the start of the rolling period, not the calendar year. The ranges are derived using a 95% confidence interval to remove outlier performance in a given year and illustrate an estimate of the potential return ranges a unitholder may experience. The historical return "high" for the year was the return that was in the top 2.5% category for observed returns, and the historical return "low" for the year was the return that was in the bottom 2.5% category for observed returns. There are probabilities that actual future returns fall outside of these historical estimated bands. Past performance does not guarantee future performance and this chart is used to illustrate the historical volatility, or return ranges, of the fund.

PORTFOLIO COMMENTARY

Q4 Summary

- All ATB Investment Management funds (the Funds) saw positive overall performance for 2023, including Q4 returns. For the full year, total returns for the six Compass Portfolios ranged from 8.9% to 13.3%, and the four ATBIS Pools ranged from 7.9% to 16.4%[1].
- After a particularly difficult 2022, in which both fixed-income and equity markets saw double-digit losses, 2023 was a welcome reprieve for investors. Both stocks and bonds recovered some lost ground, and the S&P 500 came within 0.1% of a new high.
- Recession risks still linger for 2024, but equities by and large can still be found at attractive valuations, and yields remain elevated, providing good reason to stay invested.
