

ATBIS Fixed Income Pool

As at June 30, 2022

This semi-annual management report of fund performance contains financial highlights but does not contain the semi-annual or annual financial statements of the investment fund. You can get a copy of the semi-annual financial statements upon request at no charge, by calling 1-855-386-2282, by emailing us at atbimservice@atb.com, by contacting your dealer or by visiting SEDAR at www.sedar.com.

Security holders may also contact us using these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure records or quarterly Portfolio disclosure.

Management Discussion of Fund Performance

Investment Objectives and Strategies

The ATBIS Fixed Income Pool's ("Pools") objective is to seek to earn interest income primarily by investing in, or gaining exposure to, Canadian dollar-denominated fixed income securities, including debt obligations of, or guaranteed by, Canadian federal, provincial or municipal governments, Canadian corporations, or foreign issuers (Maple bonds).

To achieve the Pool's objectives, the Pool's advisor will allocate the Pool's exposure to fixed income securities based upon its view of the market and the suitability of the investment for the Pool and by taking into account factors such as economic indicators (including growth, inflation and monetary policy), as well as its interest rate outlook.

Risk

There were no significant changes to the investment objective and strategies that affected the Pool's overall level of risk during the reporting period. The risks of investing in the Pool and the suitability of the Pool for investors remain as discussed in the Simplified Prospectus.

Results from Operations

The Pool's net asset value decreased to \$247 million as at June 30, 2022, from \$257 million at the end of 2021. The change in asset value was due to a combination of net inflows and negative investment returns.

Year to date, the Pool's Series O units returned -9.39%, outperforming the blended benchmark return of -12.23%. The Pool's return is after the deduction of fees and expenses, while broad-based index and blended benchmark returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

The following provides an asset class specific commentary for the portfolio. Returns are inclusive of the Pool's pro-rata share, where applicable, of any investment in an underlying fund (i.e. provided on a look-through basis):

Heightened inflationary pressures and the anticipation of an accelerated central bank rate hiking cycle led to Canadian yields jumping significantly during the period. The FTSE TMX Bond universe yield rose from 1.92% at the beginning of the period to 3.92% as of June 30th. This led to the worst 6 month performance of the FTSE TMX universe in decades, falling 12.2% to the end of the period on a year to date basis. Universe corporate bonds as a whole outperformed the index down 11.0% during the period, as most of the story was in rising yields rather than a significant widening in corporate bond spreads.

The unconstrained corporate bond component that represents 39% of the portfolio lost roughly 7% during the period. More than half of this portion of the portfolio's holdings consisted of below investment grade bonds, carried over from 2021 in taking advantage of wider credit spreads to start the year. Throughout the period, credit quality was improved, and duration lowered as interest rates rose. The conventional investment grade component that represents about 48% of the portfolio also outperformed the bond universe index during the period, although performance for the year was still down at -11.2%; a result of its longer duration of 5 years in the rising yield environment. The fixed income component overall continues to be positioned for the likelihood of higher future interest rates.

The commercial mortgage component continues to have an attractive ongoing yield with performance that is less influenced by the volatility in bond and equity markets.

Changes

No material changes were made to the asset mix or sub-advisors over the period.

Recent Developments

The first half of 2022 “the period” was characterized by the realization of pent up demand that had been building up during the preceding two years as a result of the COVID-19 pandemic, and Russia invading Ukraine. Energy prices had already been on the rise as a result of heightened demand, but the Russian invasion saw a disruption in oil supply as European and US sanctions limited Russia’s ability to sell oil. This led to energy prices moving up markedly—European natural gas in particular as Europe is heavily dependent on Russian natural gas. A combination of these higher energy prices, increased costs of inputs as a result of supply chain issues, and very tight labour market conditions all contributed to higher price levels over the period. Inflation in North America reached levels not seen since the 1980s, with the Canadian Consumer Price Index rising 7.7% on a year over year basis in May. The quickly rising inflation, coupled with record low unemployment levels (4.9% for June) prompted the Bank of Canada to raise the overnight lending rate three times; 0.25% in March, 0.5% in April and June.

Related Party Transactions

The Pool is managed (“Manager”) by ATB Investment Management Inc. (“ATBIM”), a wholly owned subsidiary of ATB Financial.

Throughout the period, the Pool used the services of ATB Financial and its subsidiaries for administration of the Pool. The total value of services rendered by ATB Financial, and its subsidiaries to the Pool, was \$39,738.

As of June 30, 2022, ATBIM has absorbed \$137,962 of operating expenses in the Pool.

ATBIM is the sole investor in Series A of the Pool. As at June 30, 2022, ATBIM held 589 redeemable units, valued at \$5,485 representing 0.002% of the total net asset value of the Pool.

ATBIM established an IRC which acts as an impartial and independent committee to review and provide recommendations or, if applicable, approvals with respect to any conflict of interest matters. IRC oversight ensures that there are no conflicts of interest that would be harmful to unitholders.

Semi-Annual Management Report of Fund Performance

ATBIS Fixed Income Pool (continued)

Financial Highlights

The following tables show selected key financial information about the Pool and are intended to help you understand the Pool's financial performance for the six months ended June 30, 2022 and the fiscal years indicated. The information on the following tables is based on prescribed regulations and as a result, is not expected to reconcile because the increase (decrease) in net assets from operations is based on average units outstanding during the period and all other numbers are based on actual units outstanding at the relevant point in time.

ATBIS Fixed Income Pool - Series A

PERIOD	2022	2021	2020	2019	2018	2017
Net assets, beginning of period¹	\$10.35	\$10.74	\$9.84	\$9.59	\$9.72	\$9.71

Net gain (loss) on investment for the period	(1.15)	(0.05)	1.10	0.25	(0.13)	(0.01)
Total increase (decrease) from operations²	(1.04)	0.16	1.35	0.44	-	0.10
Distributions;						
From income (excluding dividends)	-	(0.23)	(0.25)	(0.18)	(0.14)	(0.09)
From dividends	-	-	-	-	-	-
From net investment income	-	(0.23)	(0.25)	(0.18)	(0.14)	(0.09)
From capital gains	-	(0.33)	(0.20)	-	-	-
Return of capital	-	-	-	-	-	-
Total annual distributions³	-	(0.56)	(0.45)	(0.18)	(0.14)	(0.09)
Net assets, end of period⁴	\$9.31	\$10.35	\$10.74	\$9.84	\$9.59	\$9.72

(1) This information is derived from the Pool's audited annual financial statements as at December 31 of the years shown, except 2022, which is derived from the Pool's unaudited interim financial statements for the six months ended June 30, 2022.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from investment operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash, reinvested in additional units of the Pool, or both.

Ratios and Supplemental Data

PERIOD	2022	2021	2020	2019	2018	2017
Total net asset value (000's) ⁴	\$5	\$6	\$6	\$5	\$5	\$5
Number of units outstanding ⁴	589	589	559	536	526	519
Management expense ratio ⁵	1.40%	1.39%	1.38%	1.39%	1.42%	2.09%
Management expense ratio before waivers or absorptions	2.08%	2.03%	2.17%	2.28%	2.33%	3.01%
Trading expense ratio ⁶	0.00%	0.00%	0.00%	0.00%	0.00%	0.00%
Portfolio turnover rate ⁷	14.64%	44.60%	67.48%	44.66%	42.12%	87.70%
Net asset value per unit	\$9.31	\$10.35	\$10.74	\$9.84	\$9.59	\$9.72

(4) This information is provided at June 30, 2022 and December 31 of prior years shown

(5) The Management expense ratio (MER) is based on total expenses (excluding commissions and other Pool transaction costs), and the Pool's proportionate share of the MER, if applicable, of any underlying funds and exchange traded funds in which the Pool has invested, allocated to that series for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorptions can be terminated at any time. The MERs of the Pool are shown both with and without the waivers and absorptions.

(6) The trading expense ratio represents total commissions and other Pool transaction costs expressed as an annualized percentage of daily average net asset value during the period.

(7) The Pool's portfolio turnover rate indicates how actively the Pool's Advisor manages its portfolio of investments. A portfolio turnover rate of 100% is equivalent to the Pool buying and selling all of the securities in its portfolio once in the course of the period. The higher a Pool's portfolio turnover rate in a period, the greater the trading costs payable by the Pool in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Pool.

(6) The trading expense ratio represents total commissions and other Pool transaction costs expressed as an annualized percentage of daily average net asset value during the period.

(7) The Pool's portfolio turnover rate indicates how actively the Pool's Advisor manages its portfolio of investments. A portfolio turnover rate of 100% is equivalent to the Pool buying and selling all of the securities in its portfolio once in the course of the period. The higher a Pool's portfolio turnover rate in a period, the greater the trading costs payable by the Pool in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Pool.

Management Fees

ATBIM receives management fees of 1.25% per annum for Series A and 0.5% per annum for Series F1. The management fees for Series A and Series F1 are calculated as a percentage of their net asset value as of the close of business on each business day. Management fees for Series O are payable directly to the Manager by Series O investors and not by the Pool.

For the period ended June 30, 2022, the Pool paid ATBIM management fees of \$41.071. The Pool's management fees were used by ATBIM to: pay costs for managing the investment portfolios; provide investment analysis and recommendations; make investment decisions; purchase and sell investments; and provide other services. There are no trailer fees associated with the Fund.

Past Performance

The performance information shown assumes all distributions made by the Pool were reinvested into additional units of the Pool. The performance information does not take into account sales, redemptions, distributions or other optional charges that would have reduced returns or performance. Past performance of the Pool does not necessarily indicate how it will perform in the future.

Year by Year Returns

The following information shows the Pool's performance for the six months ended June 30, 2022 and for each of the previous years shown. The bar charts illustrate how the Pool's performance has changed from period to period and also indicates in percentage terms, how much an investment made on the first day of each financial period would have increased or decreased in value by the last day of each period.

The summary provides a snapshot of the investment portfolio by security type, industry and geographical location. The information is presented on a look-through basis for any investments in underlying funds.

The summary of investment portfolio may change due to ongoing portfolio transactions in the investment fund. The most recent annual or semi-annual reports are available at no cost by calling 1-855-386-2282, by e-mailing ATBFunds@atb.com or by visiting our website at www.atb.com/wealth. Prospectus and other information about underlying investment funds is available on the internet at www.sedar.com.

Caution Regarding Forward-Looking Statements

This report may include forward-looking statements about the Pool. These statements “Results from Operations” and “Recent Developments” may involve, but are not limited to, forward-looking statements about the Pool and may make references relating to strategy, risks, expected performance and condition. Forward-looking statements typically use words like “anticipate”, “believe”, “estimate”, “expect”, “intend”, “may”, “plan” or other similar expressions or future or conditional verbs such as “could”, “should”, “would” or “will.”

By their very nature, forward-looking statements require numerous assumptions and are subject to inherent risks and uncertainties, both general and specific, concerning future performance, strategies or prospects and possible future Pool action. A number of factors could cause actual future results, conditions, actions or events to differ materially from the current expectations, estimates, intentions or projections about future general economic, political and other relevant market factors in North America and internationally including, but not limited to, interest rates, foreign exchange rates, equity and capital markets, business competition, technological changes, catastrophic events and the general business economy. Such factors assume no changes to applicable tax, other laws, government regulation or legislation.

The Pool cautions readers that the aforementioned list is not exhaustive. Anyone reading and relying on forward-looking statements should carefully consider these and other factors that could potentially have an adverse affect on the Pool’s future results as there is a significant risk that forward-looking statements will not prove to be accurate.

The reader is reminded that the cautions listed above are not exhaustive. The Pool does not undertake to update any forward-looking statement contained in this report.
