

Flex Fit Business Banking Tiers

This account is for the majority of business owners, especially those whose needs fluctuate month-to-month due to seasonality or unpredictable business volumes.

- Start each month paying only \$19 for any combination of the first 25 debit and credit transactions.
- After 25 transactions: \$1.00 for each additional transaction up to the next tier. The monthly fee will automatically adjust depending on how many transactions used, taking the guesswork out of picking the right account

If you consistently make more than 110 transactions a month, it's a good idea to switch to the Unlimited Business Banking.
