

Credit Card or Debit Card?

Fill in the chart below with the type of card you think is being used for each scenario.

Transaction Scenario	Debit Card	Credit Card
You go to the bank machine to take \$20 out of your account.		
You buy \$10 of boosters through your phone's app that is linked to your Online Account.		
You go see a new movie at the theatre and use the card that earns points for every \$2 you spend.		
Your friend goes to the bank machine and takes out \$100. The \$100 has an interest charge on it.		
You go out to dinner with your friends and get a meal for \$15. You know you have enough money in your account because you budgeted for it this month.		
You buy a hot chocolate at the concession. Your account balance is reduced by \$3.		
You buy a brand new pair of hockey skates for \$250. You only have \$220 in your account.		
Bonus: You buy your first car for \$2500. You have \$500 in your bank account and your Credit Card limit is \$1000.
