Management Discussion of Fund Performance

Investment Objectives and Strategies

The Compass Growth Portfolio ("the Portfolio") aims to provide investors with long-term capital appreciation by investing in a diversified portfolio of primarily equity securities, with some fixed income securities to reduce volatility.

Under normal conditions, the Portfolio holds an asset-mix consisting of 5-15% fixed income, 16-26% Canadian equity, 26-36% US equity, 23-33% international and global equity, and 5-15% alternative investments, comprised of Real Estate Investment Trusts ("REITs") and Private Equity Investments. The investments held in the Portfolio are diversified by asset class and investment style to minimize volatility and maximize risk-adjusted long-term returns.

Risk

No major changes were made to the Portfolio's asset mix during the period. The mix is monitored on a regular basis and each asset class is generally kept to within 1% of its target allocation. The risks of investing in the Portfolio remain as outlined in the Prospectus.

Results from Operations

The Portfolio's net asset value increased slightly to \$1.1 billion as at June 30, 2019, from \$954 million at the end of 2018. The change in asset value was due to a combination of net outflows and investment returns.

Year to date, the Portfolio's Series A units returned 11.01%, outperforming the broad-based index return of 9.38% and underperforming the blended benchmark return of 12.59%. The Portfolio's return is after the deduction of fees and expenses, while broad-based index and blended benchmark returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

The following provides an asset class specific commentary for the Portfolio, returns are inclusive of the Portfolios pro-rata share, where applicable, of any investment in an underlying fund i.e. provided on a look-through basis:

Fixed Income

The conventional bond component that represents about 5% of the portfolio experienced a gross return of about 6.5% for the first six months. The Bank of Canada held its short-term interest rate target constant at 1.75%. However, due largely to the belief that the American central bank (the Federal Reserve) would reduce its interest-rate target before the year is out, and that the Bank of Canada might follow, interest rates of longer-maturity bonds fell considerably and imparted a significant price gain to those bonds and also to the broad bond index.

The high-yield corporate bond component that represents about 5% of the portfolio experienced a 3.4% gross return in the first half of the year. This portion of the portfolio currently consists of higher-quality short-term bonds, and therefore its performance was barely affected by the long-bond rally.

Real Estate Investment Trusts

REITs represent about 3.5% of the portfolio. Their prices rose sharply, particularly in the first quarter, and along with their dividend income their gross return in the first six months was just under 14%.

Equities

The conventional large-cap equities that together make up about two-thirds of the portfolio had an exceptionally strong first half, as they recovered from their late-2018 decline. For the period, Canadian stocks returns were about 14%, US stock returns were about 15% and overseas stock returns were about 10%.

Canadian, US and global small-cap stocks each represent about 6% of the portfolio. Canadian small-cap returns for the period were 15%, while US small-cap returns were 11% and global small-cap returns were 16%.

The portfolio's private equity holdings, at just over 1% of portfolio weight, had a 3% return for the first half of the year.

Summary

The portfolio contains almost exclusively equities. All the major equities categories and one of the fixed income categories exhibited above-average returns for the first half of the year and so the resulting portfolio return was also above average.

Changes

The QV Global large-cap equity mandate, which represented about 6% of the portfolio's weight, was moved to a nearly equal combination of the Mawer US Equity mandate and iShares Core MSCI EAFE exchange-traded fund.

Recent Developments

As of May 15, 2019, QV Investors Inc. ("QV") ceased to act as sub-advisor to ATB Investment Management Inc. ("ATBIM") for the ATBIS U.S. Equity Pool and ATBIS International Equity Pool as well as for the foreign equity portion of Compass Conservative Portfolio, Compass Conservative Balanced Portfolio, Compass Balanced Portfolio, Compass Balanced Growth Portfolio, Compass Growth Portfolio, and Compass Maximum Growth Portfolio. Mawer Investment Management Ltd. continues to act as a sub-advisor to ATBIM in respect of the foreign equity component of the Compass Portfolios and were subject to an increase in allocation of some or all of the foreign equity assets previously managed by QV. ATBIM continues to retain the services of QV to act as sub-advisor in respect of the active Canadian equity portfolio assets of the Compass Portfolios.

There are no other developments to report at this time related to the strategic positioning of the Portfolio, the manager, or to the policies of the IRC.

Related Party Transactions

The Portfolio is managed by ATB Investment Management Inc. ATB Investment Management Inc. is a wholly owned subsidiary of ATB Financial.

Throughout the period, the Portfolio used the services of ATB Financial and its subsidiaries for administration of the Portfolio. The total value of services rendered by ATB Financial and its subsidiaries to the Portfolio, was \$18,085.

ATB Investment Management Inc. has established an independent review committee ("IRC") which acts as an impartial and independent committee to review and provide recommendations or, if appropriate, approvals with respect to any conflict of interest matters. IRC oversight ensures that there are no conflicts of interest that would be harmful to unit holders.

Financial Highlights

The following tables show selected key financial information about the Portfolio and are intended to help you understand the Portfolio's financial performance for the six months ended June 30, 2019 and the fiscal years indicated. The information on the following tables is based on prescribed regulations and as a result, is not expected to reconcile because the increase (decrease) in net assets from operations is based on average units outstanding during the period and all other numbers are based on actual units outstanding at the relevant point in time.

(4) This information is provided at June 30, 2019 and December 31 of prior years shown.

(5) The management expense ratio (MER) is based on total expenses (excluding commissions and other portfolio transaction costs), and the Portfolio's proportionate share of the MER, if applicable, of any underlying funds and exchange-traded funds in which the Portfolio has invested, allocated to that series for the stated period and is expressed as an annualized percentage of daily average net asset values during the period. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorptions can be terminated at any time. The MERs of the Portfolio are shown both with and without the waivers and absorptions.

(6) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

(7) The Portfolio's portfolio turnover rate indicates how actively the Portfolio's Portfolio Advisor manages its portfolio of investments. A portfolio turnover rate of 100% is equivalent to the Portfolio buying and selling all of the securities in its portfolio once in the course of the period. The higher a Portfolio's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Portfolio.

Caution Regarding Forward-Looking Statements

This report may include forward-looking statements about the Portfolio. These statements “Results from Operations” and “Recent Developments” may involve, but are not limited to, forward-looking statements about the Portfolio and may make references relating to strategy, risks, expected performance and condition. Forward-looking statements typically use words like “anticipate”, “believe”, “estimate”, “expect”, “intend”, “may”, “plan” or other similar expressions or future or conditional verbs such as “could”, “should”, “would” or “will.”

By their very nature, forward-looking statements require numerous assumptions and are subject to inherent risks and uncertainties, both general and specific, concerning future performance, strategies or prospects and possible future portfolio action. A number of factors could cause actual future results, conditions, actions or events to differ materially from the current expectations, estimates, intentions or projections about future general economic, political and other relevant market factors in North America and internationally including, but not limited to, interest rates, foreign exchange rates, equity and capital markets, business competition, technological changes, catastrophic events and the general business economy. Such factors assume no changes to applicable tax, other laws, government regulation or legislation.

The Portfolio cautions readers that the aforementioned list is not exhaustive. Anyone reading and relying on forward-looking statements should carefully consider these and other factors that could potentially have an adverse affect on the Portfolio’s future results as there is a significant risk that forward-looking statements will not prove to be accurate.

Readers should not place undue reliance on forward-looking statements, as actual results may differ materially from plans, objectives, and expectations. The Portfolio does not undertake to update any forward-looking statement contained in this report.
